PREVENTING EVICTIONS IN BEIRUT: EXHIBITION AND DOCUMENTARIES ABOUT HOUSING MONITOR

By *Public Works Studio and World Habitat*.

Housing Monitor is a housing rights project in Beirut run by Public Works Studio. It provides a safe and secure database for people to report housing violations and responds to individuals' housing needs with access to legal and social services, building awareness among vulnerable groups, particularly refugees and migrant domestic workers, who have limited legal representation and/or knowledge of their rights.

In this workshop, the Co-Habitat Network will present the overall process around its main 2022 activity: the systematization of different community-led housing projects across the globe. By *Global Platform for the Right to the City*. Earlier this year, the GPR2C, along with Observatori DESC has published a guide to implement indicators

to follow-up on the implementation of municipal policies aligned with the Right to the City and as an accelerator for the implementation of global agendas such as the New Urban Agenda and the Sustainable Development Goals. Come join us to get to know the methodology, how it has been implemented in Barcelona and discuss the potential on how it can be implemented in other cities as well.

ACTIVATING UNIVERSITIES' ROLE IN PRODUCING SOCIALLY JUST HABITATS

By *DPU-UCL*. This roundtable discussion will invite perspectives and listen to the voices of CSOs and other actors engaging with universities in the production of socially just habitats. It is part of a wider project interrogating the 'public' role of the university across education, research and public engagement, and exploring how international networks with universities can activate levers of change.

17:00 - 18:00

CLIMATE DISPLACEMENT AND THE HLRN VIOLATIONS DATABASE

By *Habitat International Coalition*. This session will discuss the issue of climate-related displacements, building on the work carried out and data collected by the Housing and Land Rights Network, on their Violation Database, which maps housing and land rights violations across the globe, in particular regarding the social and territorial effects of conflict, megaprojects, privatization of public services and the commodification of social housing.

WEDNESDAY 29TH

CLAIMING AND PRODUCING HOUSING RIGHTS: CROSS-REGIONAL EXPERIENCES FROM GRASSROOTS ORGANISATIONS AND INTERNATIONAL NETWORKS (1/2)

grassroots leaders from different regions will briefly present initiatives being put forward for the claiming and production of housing rights. RAPID URBANISATION, CLIMATE CATASTROPHE AND SOCIAL INEQUALITY

By *Misereor*. From housing, adaptation & mitigation, land management, gender equality and food sovereignty to mobility systems – conventional urban actions hardly respond to the enormous structural urban challenges we are facing. But what transformative approaches and experiences does civic engagement have to achieve (which) positive urban visions? And what does «transformative» mean in this context?
